Banks are giving less priority to tarmers.

Seeds and pesticides should be provided at low sudsidy

> Conducting experiments, developing new seeds, sharing findings with farmers.

Negotiating prices, connecting farmers to markets, optimizing transortation.

Irrigation

techniques

should be

improved.

What are their wants, needs, hopes, and dreams? What other thoughts might influence their behavior?

> Cultivation of Crops

Thinks

depending on climate.

INDIA'S AGRICULTURAL CROP PRODUCTION ANALYSIS (1997-2021)

Adjusting planting schedules, using irrigation methods, experimenting with crop varieties.

Mixed emotions over changing weather patterns, hopeful during good harvests, frustrated during crop failures.

Feels

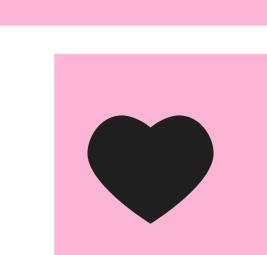

What are their fears, frustrations, and anxieties? What other feelings might influence their behavior?

Implementing subsidy programs, formulating disaster response plans, promoting organic farming.

Values accurate data and comprehensive analysis.

Concern for food security and sustainability.

Curiosity about how external factors impact crop yields.

Does

What behavior have we observed? What can we imagine them doing?
